COOLSEAL FLOWER PACKAGING

At Coolseal, part of the Tri-Pack family, we're redefining the way fresh flowers are packaged and delivered – with sustainability, strength, and freshness in mind.

Traditional flower packaging can often fall short - easily damaged by moisture, lack of durability, and not built to truly protect your delicate blooms. The Coolseal Flower Packaging System changes that.

5.

Traditional flower packaging has long presented challenges. Cardboard materials can weaken or warp when exposed to moisture and various packaging forms lack the structural integrity needed to withstand transport.

The Coolseal Flower Packaging System is engineered to change that narrative.

6.

REUSABLE FLOWER PACKAGING FOR FLORISTS AND WHOLESALEERS

Brand new reusable flower packaging

Coolseal reusable flower packaging is design to be used by growers, wholesalers, and florists around the world.

An alternative to traditional floral cardboard boxes, Coolseal is designed to be durable and water resistant packaging solution that ensures flowers arrive fresh and in perfect condition.

I.

Coolseal flower packaging won't break down when wet, keeping bouquets protected from moisture and rough handling throughout transport and storage. Crafted to meet the needs of growers, distributors, and retailers, Coolseal is reliable and sustainable. Our flat-packed boxes offer a 100% recyclable solution that keeps bouquets, stems, and arrangements in excellent condition.

Whether you are handling delicate roses, tulips, or exotic orchids, or preparing large mixed bouquets, Coolseal is the perfect packaging to suit your flowers and your operations.

8.

REUSABLE AND RECYCLABLE

Fully recyclable and lightweight, Coolseal helps businesses reduce waste while presenting a polished, eco-friendly image.

Coolseal's durable construction allows the packaging to be reused multiple times, cutting down on costs and minimising the need for single-use materials.

Unlike traditional flower packaging, Coolseal won't weaken or lose shape when exposed to moisture, keeping flowers protected and fresh from storage to delivery.

Designed with florists and wholesalers in mind, it's easy to handle, stack, and store, making daily operations more efficient while reinforcing a commitment to sustainability and quality.

Join the sustainable packaging movement

Pack flowers in Coolseal box
Deliver safely - moisture-resistant & insulated
Reuse or recycle for next shipment

10.

THE BENEFITS

Specially Designed To Be Reusable

Coolseal flower packaging is specially designed to be reusable. Its durable construction allows it to be repurposed multiple times, helping reduce waste and support a more sustainable supply chain.

Robust & Water-Resistant

Coolseal boxes won't collapse when wet. Your flowers stay protected through every stage of the journey.

Environmentally Friendly

Fully recyclable and designed for a circular economy, helping reduce waste and your carbon footprint.

11.

Designed With You in Mind

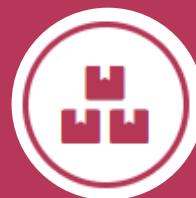

Easy to handle, stack, and transport. Our packaging system is tailored to meet the real-world needs of growers, suppliers, and retailers.

Keeps Flowers Fresh

The materials and design help maintain freshness, ensuring your flowers arrive in pristine condition.

Lightweight Design

Another key advantage of Coolseal flower packaging is its lightweight design. Being significantly lighter than traditional materials, it helps reduce transportation costs and lowers carbon emissions. This not only makes handling and shipping more efficient but also supports a more sustainable and cost-effective distribution process.

12.

MAKE THE SWITCH

Innovation Rooted in Sustainability

As part of the Tri-Pack family, we bring decades of expertise in sustainable packaging to the floral industry. The Coolseal Flower Packaging System is our latest step toward a greener future - without compromising performance.
